Looking To Future

About Us

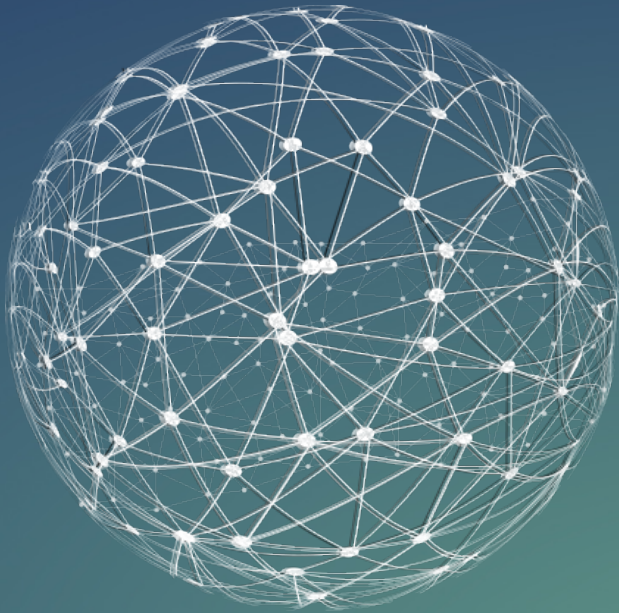

About Us

The rise of the APP economy has changed people' s daily living habits from all angles.

At present, DAPP based on Blockchain technology is still in the early stage of exploration, and there is no DAPP with large-scale practical application value. The vast majority of DAPPs are still throwing dice, exchanges, pets, etc. The scene is single and the user experience is poor.

So we came up with an idea of combining the most popular poker game 'Texas Holdem' and Blockchain together so the players can enjoy the security, freedom, transparency, traceability and other benefits brought by decentralization, and completely avoid the exploitation of the centralized gaming game providers.

Our Advantage

Our Advantage

The game process is transparent and fair

The process of shuffling is performed by all players participating in the game and confirms the final result. The result of shuffling alone cannot be manipulated by the dealer or a certain player.

Fair and safe game environment

Join the game with TronLink
Sensitive information such as user accounts and balances will no longer be stored in the server of the traditional centralized solution, thus fully protecting the player's account privacy and security.

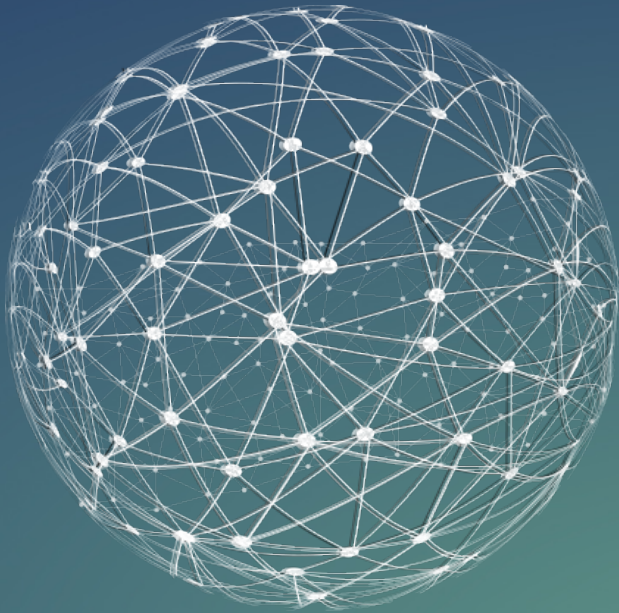

No dealer or Super player

All players in the game are equal, there is no super player or dealer. The final game's results and process data will be packaged into block data and stored on the chain, open to all players.

Best poker game experience

The best decentralized Texas Hold 'em game experience now. We will continue to work hard to ensure the continuous optimization of the player experience.

Game Fairness

About Shuffle

Fund settlement

Shuffle

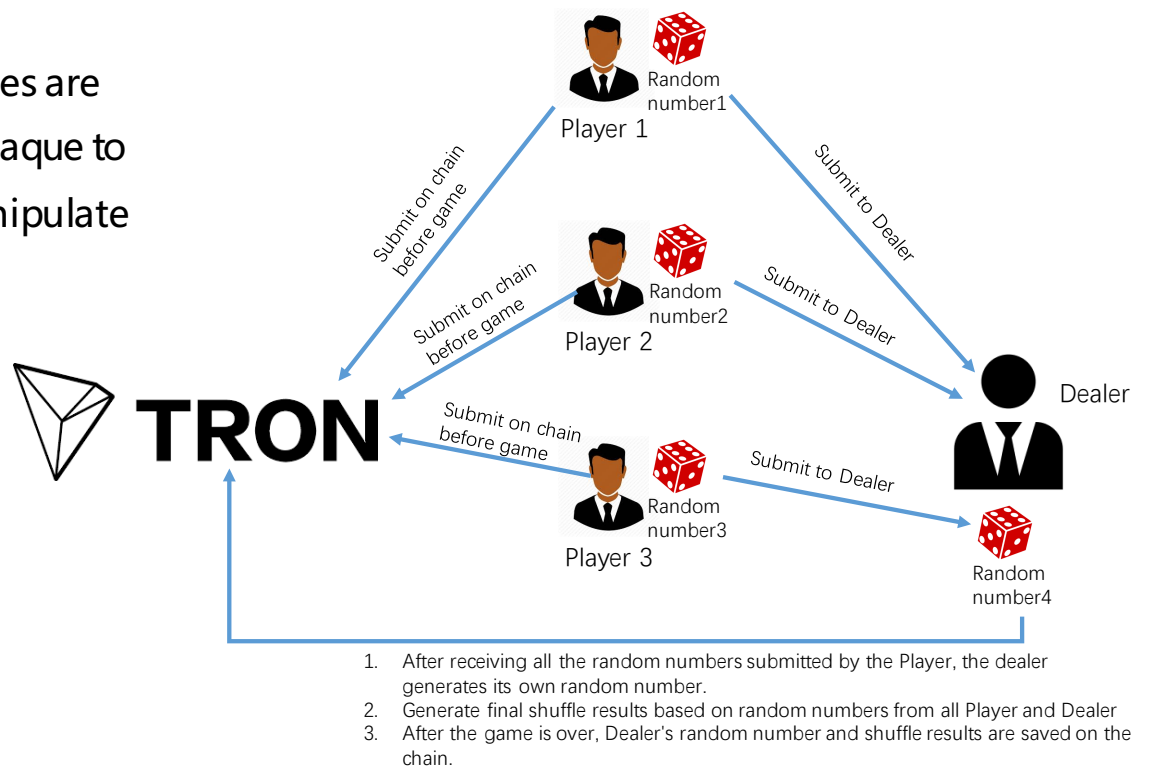

Centralized online poker is unfair

Centralized online poker game, all shuffling processes are controlled by a centralized game server, which is opaque to the player, and the centralized server can easily manipulate the process and results.

Our platform makes full use of the decentralization principle to ensure the fairness of shuffling

The shuffling result is determined by all Players and Dealers.

The SEED generated by player and dealer will be saved on the chain, the process is open and transparent.

Fund Settlement

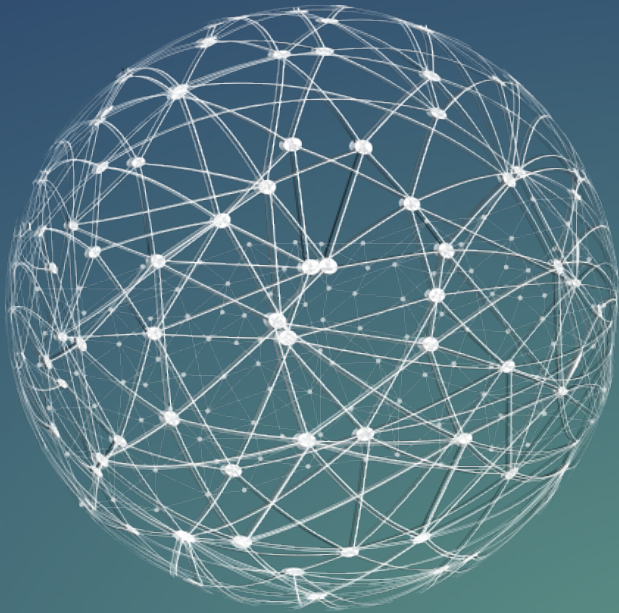

Player information submit on chain before the start of each game

- Player's position information
- Chip amount information brought in by the player
- SEED information for shuffle

After the end of each game, Dealer informs the winning player to package the results of the game on chain, including

- The position of winning player
 - SEED information for shuffle
 - All player revenue
 - Game process information
- The player' s revenue is executed in real time by smart contracts deployed on the TRON chain and immediately reflected on the player' s chip information.
 - If the player leaves the game, the remaining chips will be converted into TRX.

Price Pool

Basic Function

Current Function

Game Table

Blind Structure	Table number	Min Buy-in	Max Buy-in
5/10	10	50BB	250BB
10/20	12	50BB	250BB
20/40	12	50BB	250BB
50/100	6	40BB	250BB

Service Fee

For game pots, the platform will deduct a certain percentage of chips and form a public prize pool.

- The service fee will only be deducted from the pot of the winning player.
- The deducted service fee will be accumulated in the prize pool and will be redistributed periodically.

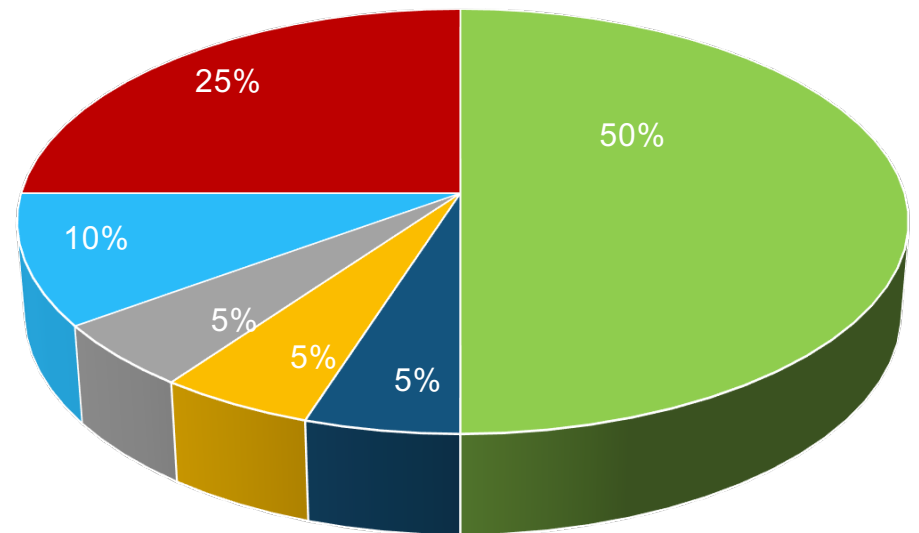

Service fee collection ratio

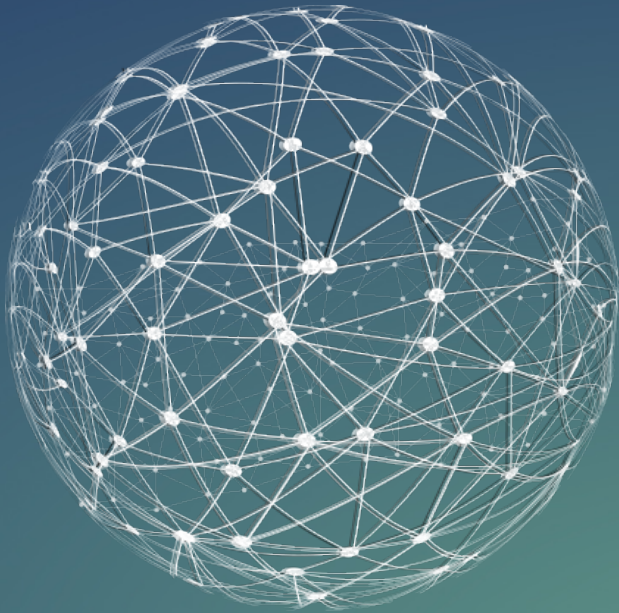

- 5/10 Table: 3% from Pot, Minimum 1TRX
- 10/20 Table: 3% from Pot, Minimum 2TRX
- 20/40 Table: 3% from Pot, Minimum 4TRX
- 50/100 Table: 3% from Pot, Minimum 10TRX

Price Pool

Allocated every three days

- Players participating in the Top 20 game lot allocate 50% of the prize pool according to the number of lots.
- Top 3 players in the profit ranking allocate 5% of the prize pool in proportion to 50%/30%/20%.
- The largest Top3 hand in the winning hand allocate 5% of the prize pool by 50%/30%/20%.
- Lose the game's Top3 hand allocate 5% of the prize pool by 50%/30%/20%.
- Players with a total profit ranking of Bottom3 allocate 10% of the prize pool by 50%/30%/20%.
- Reserved for subsequent game operations and new feature development.

Token Issue

Issue PKC (PokerWin Coin) one month after online

You can mine PKC in a variety of ways to be our shareholder.

PKC plans to enter the exchange in the future.

Focus on the token white paper for more details.

Our Vision

Become the world 's best decentralized poker gaming platform, providing players with the most secure and best-selling multi-player competitive gaming experience. In this process, share growth income with shareholders and players.

Thank you for your trust
Let us grow together in the future

PokerWin

The logo features the word "PokerWin" in a bold, yellow, 3D-style font with a brown outline. A small diamond icon is integrated into the letter 'o' of "Poker". Above the text, there are several floating icons: a red playing card, a red chip, and a black playing card, all set against a background of a glowing blue and green globe with a network of white dots and lines.
